Optimize what you already own. Scale only when the mission requires it.

COMPANY OVERVIEW

MYJEN Consulting LLC is a veteran-owned IT advisory firm helping government, commercial, and non-profit organizations maximize the mission value of every IT dollar. We optimize existing, compliant investments first, then field new technology deliberately, with security and compliance protected throughout.

CORE CAPABILITIES

01 ASSESS	Infrastructure, security posture, cloud cost, and application portfolio.
02 OPTIMIZE	Tool consolidation, FinOps, enterprise IT O&M, managed IT, and network management.
03 SECURE	Cyber risk management, NIST SP 800-53 control assessment, identity and access management, incident management, and security training.
04 SCALE	Vendor-neutral technology selection, systems integration, custom development and DevOps, cloud migration, AI enablement, and PMP-led program management.

MISSION DOMAINS

- Benefits & claims systems
- Regulatory & IP environments
- Defense & national security
- Federal financial systems
- Citizen-facing services
- Data & analytics programs

WHAT SETS US APART

- **Optimization-first, not optimization-only.** We maximize compliant platforms an agency already owns before recommending new spend.
- **Set-aside and sole-source eligible, vendor-neutral.** SBA-certified SDVOSB and VOSB, with independent technology selection and procurement support.
- **Security-conscious, PMP-led delivery.** Grounded in FISMA, FIPS 199, and NIST SP 800-53, with PMI-CPMAI credentialed AI program management.

KEY PERSONNEL EXPERIENCE

Founder, President & CEO Michael Jenkins, MBA, PMP, CISM, a U.S. Army veteran, brings 25+ years in IT and has delivered results for:

SBA	Directed a 60-member cybersecurity team integrating ServiceNow and GRC tools; cut incident response and phishing risk 30%.
VA	Managed firewall, network, and ServiceNow CMDB deployment across 50+ VA facilities; cut delays 40%.
USPTO	Led secure cloud architecture on FedRAMP-authorized services (FISMA, FIPS 199, NIST SP 800-53); cut vulnerabilities 45%.
FRTIB	Led SIEM and ServiceNow ITSM integration for enterprise incident management; cut response times 50%.
Dept. of State	Led A&A and POA&M under NIST SP 800-53: 100% authorization renewals; cut critical vulnerabilities 60%.
Dept. of Defense	Delivered mission-critical applications for the Missile Defense Agency (MDA) at 99.9% uptime. Separately, administered and secured networks at the Pentagon, supporting the Air Force Pentagon Communications Agency (AFPCA, now the 844th Communications Group), at 99.9% uptime.

Results are from Michael Jenkins's prior roles with other employers, presented as key personnel experience under FAR 15.305(a)(2)(iii). MYJEN claims no company-level prime past performance.
